

A series of papers by E.H.Battley on the thermodynamics of microbial growth.

Battley, E.H., 2006. On the sources of thermal energy exchange accompanying microbial catabolism., *J. Theoret. Biol.*, 241: 142-151.

Battley, E.H., 2003. Absorbed heat and heat of formation of dried microbial biomass. Studies on the thermodynamics of microbial growth., *J. Therm. Anal. Cal.*: 74, 709-721.

Battley, E.H., 2002. On the use of ΔQ rather than $T\Delta S$ in the calculation of ΔG accompanying the oxidation or fermentation of catabolic substrates of biological importance in their standard states., *Thermochimica Acta*, 394: 313-327.

Battley, E.H. and J.R. Stone, 2000. On the inequality of ΔQ and $T\Delta S$ with respect to solid state organic substances of biological importance., *Thermochimica Acta* 360: 1-9.

Battley, E.H. and J.R. Stone, 2000. A comparison of values for the entropy and the entropy of formation of organic substances in the solid state, as determined experimentally or by empirical calculation., *Thermochimica Acta* 349: 153-161.

Battley, E.H., 1999. The Thermodynamics of Cellular Growth. In: *Handbook of Thermal Analysis.*, P. Gallager (Ed.), Vol. 4, Life Sciences, Chapter 5., R.B.Kemp (Ed.), Elsevier, Amsterdam, pp. 219 - 266.

Battley, E.H., 1999. On entropy and absorbed thermal energy in biomass; a biologist's perspective., *Thermochimica Acta* 331: 1-12.

Battley, E.H., 1999. An empirical method for estimating the entropy of formation and the absolute entropy of dried microbial biomass for use in studies on the thermodynamics of microbial growth., *Thermochimica Acta* 326: 7-15.

Battley, E.H., 1998. The development of direct and indirect methods for the study of the thermodynamics of microbial growth. *Thermochimica Acta* 309: 17-37.

Battley, E.H., 1998. Augustin Pierre Dubrunfaut., *Thermochimica Acta* 308: 1-3.

Battley, E.H., R.L. Putnam, and J. Boerio-Goates, 1997. Heat capacity measurements from 10 to 300 K and derived thermodynamic functions of lyophilized cells of *Saccharomyces cerevisiae* including the absolute entropy and the entropy of formation at 298.15 K., *Thermochimica Acta* 298: 37-46.

Battley, E.H., 1996. On the thermodynamics of autotrophic and heterotrophic growth of *Pseudomonas saccharophila*., *Can. J. Microbiol.* 42: 38-45.

Battley, E.H., 1995. The advantages and disadvantages of direct and indirect calorimetry. *Thermochimica Acta* 250: 337-352.

Battley, E.H., 1995. An apparent anomaly in the calculation of ash-free dry weights for the determination of cellular yields., *Appl. Environ. Microbiol.* 61: 1655-1657.

Battley, E.H., 1995. A reevaluation of the thermodynamics of growth of *Saccharomyces cerevisiae* on glucose, ethanol, and acetic acid., *Can. J. Microbiol.* 41: 388-398.

Battley, E.H. 1994. Comment on the state of development of applied calorimetry in 1994. *Thermochimica Acta*, 251: 207-208.

Battley, E.H., 1993. Calculation of the entropy change accompanying the growth of *Escherichia coli* K-12 on succinic acid., *Biotechnol. Bioeng.*, 41, 422-428.

Battley, E.H., 1993. The thermodynamics of growth of *Escherichia coli* K-12 on succinic acid., *Pure Appl. Chem.*, 65: 1881-1886.

Battley, E.H., 1992. A calculation of the thermodynamic properties of the protein in *Escherichia coli* K-12 grown on succinic acid, the energy changes accompanying protein anabolism, and the energetic role of ATP in protein synthesis., *Biotechnol. Bioeng.* 40: 280-288.

Battley, E.H., 1992. On the calculation of the free-energy change accompanying the growth of *Escherichia coli* K-12 on succinic acid., *Biotechnol. Bioeng.*, 39: 589-595.

Battley, E.H., 1992. On the enthalpy of formation of *Escherichia coli* K-12 cells., *Biotechnol. Bioeng.* 39: 5-12.

Battley, E.H., 1991. An alternate method of calculating the heat of growth of *Escherichia coli* on succinic acid., *Biotechnol. Bioeng.* 38: 480-492.

Battley, E.H., 1991. Calculation of the heat of growth of *Escherichia coli* on succinic acid, *Biotechnol. Bioeng.* 37: 334-343.

Battley, E.H., 1987. *Energetics of Microbial Growth*. Wiley Interscience, New York, 450 pp.

Battley, E.H. and G. DiBiase, 1980. Convenient method of preparing microbial cells for bomb calorimetry. *Biotechnol. Bioeng.* 22: 2417-2418.
